

Final Project: Week 4 Manual Test Plan

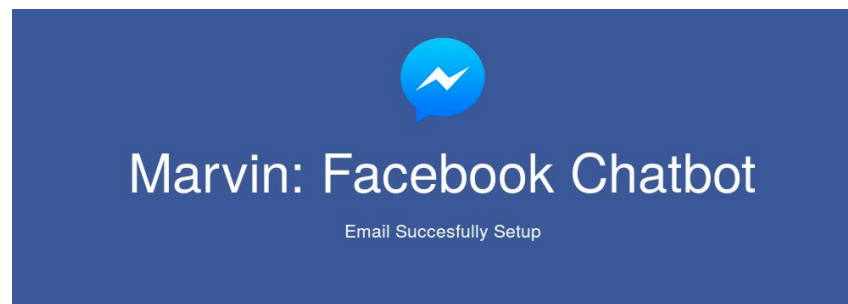

1. Send Marvin a number of messages:

- a. Send "@setupemail <email>" - response should be " ?

- i. 
- ii. Press the authenticate button. This should open a tab to go authenticate gmail api

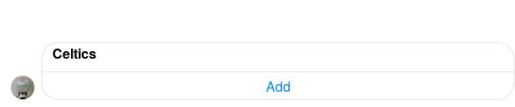

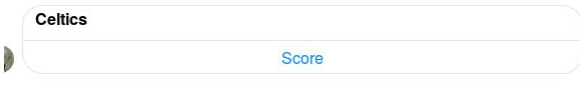

- iv. Follow through these steps
- v. Should be redirected to

- vi. Send email using "@email <to>, <subject>, <body>". Email should be delivered

- b. Send "@addteam nba celt" - response should be a button to add a team

- i. 
- ii. Send message "@scores"
- iii. 
- iv. Press the score button
- v. A score should respond

Last Game: 2017-11-30
Boston Celtics: 108
Philadelphia 76ers: 97

- vi.
- vii. Send "@myteams" this should respond with a set of remove buttons.
- viii. Press one of the remove buttons
- ix. See that the remove button has caused the remove to disappear from the list by sending "@myteams" again
- c. Send messages that would be a way to ask about the weather or what to wear
 - i. Response should be either asking for location to get weather data
 - ii. This is processed with NLP so try a wide range of inputs
- d. Send messages that would be a way to ask about temperature
 - i. Response should be either asking for location to get weather data
 - ii. This is processed with NLP so try a wide range of inputs
- e. Send a message about a tip and a number
 - i. The output should be a set of tip calculations

tip for 45.23

ii.

Here are tip results for \$45.23.
10% would be \$4.52.
15% would be \$6.78.
20% would be \$9.05.

- iii. Try a range of inputs because it is process with NLP
