

## Final Project: Week 2 Manual Test Plan

### 1. Send Marvin a number of messages:

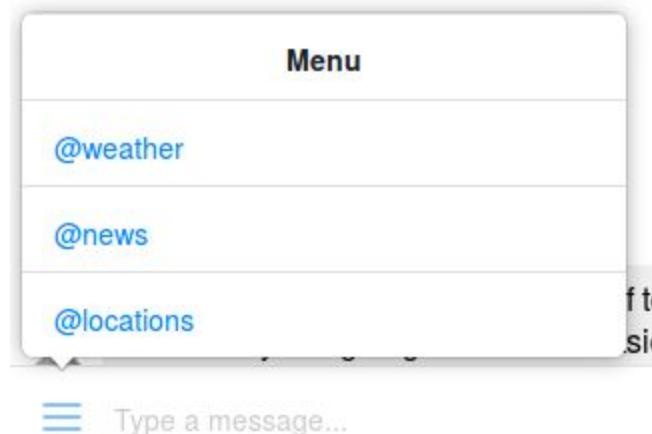

- a. Send “@news” - response should be a carousel of news articles and headlines. These should look like this

- i.
- b. Send “@weather” - response should be recommended clothing - check that it aligns with today’s weather.
  - i. Here is an example for today

- c. Send “@locations” - response should be a set of names
  - i. These are the set of locations stored for the you. This returns the set of names stored in the locations table of the database.
- d. Send “@location new” - there should be no response
- e. Send “@locations” - response should be same as before but with new added to end. This shows that locations are being stored.
- f. Click on the menu in the bottom right corner. This should display a menu with 3 options. “@news, @locations, and @weather”. Press one of these and see that the send message action aligns with the expected result.
